Subject: [Group 14] Report on the Second Progress

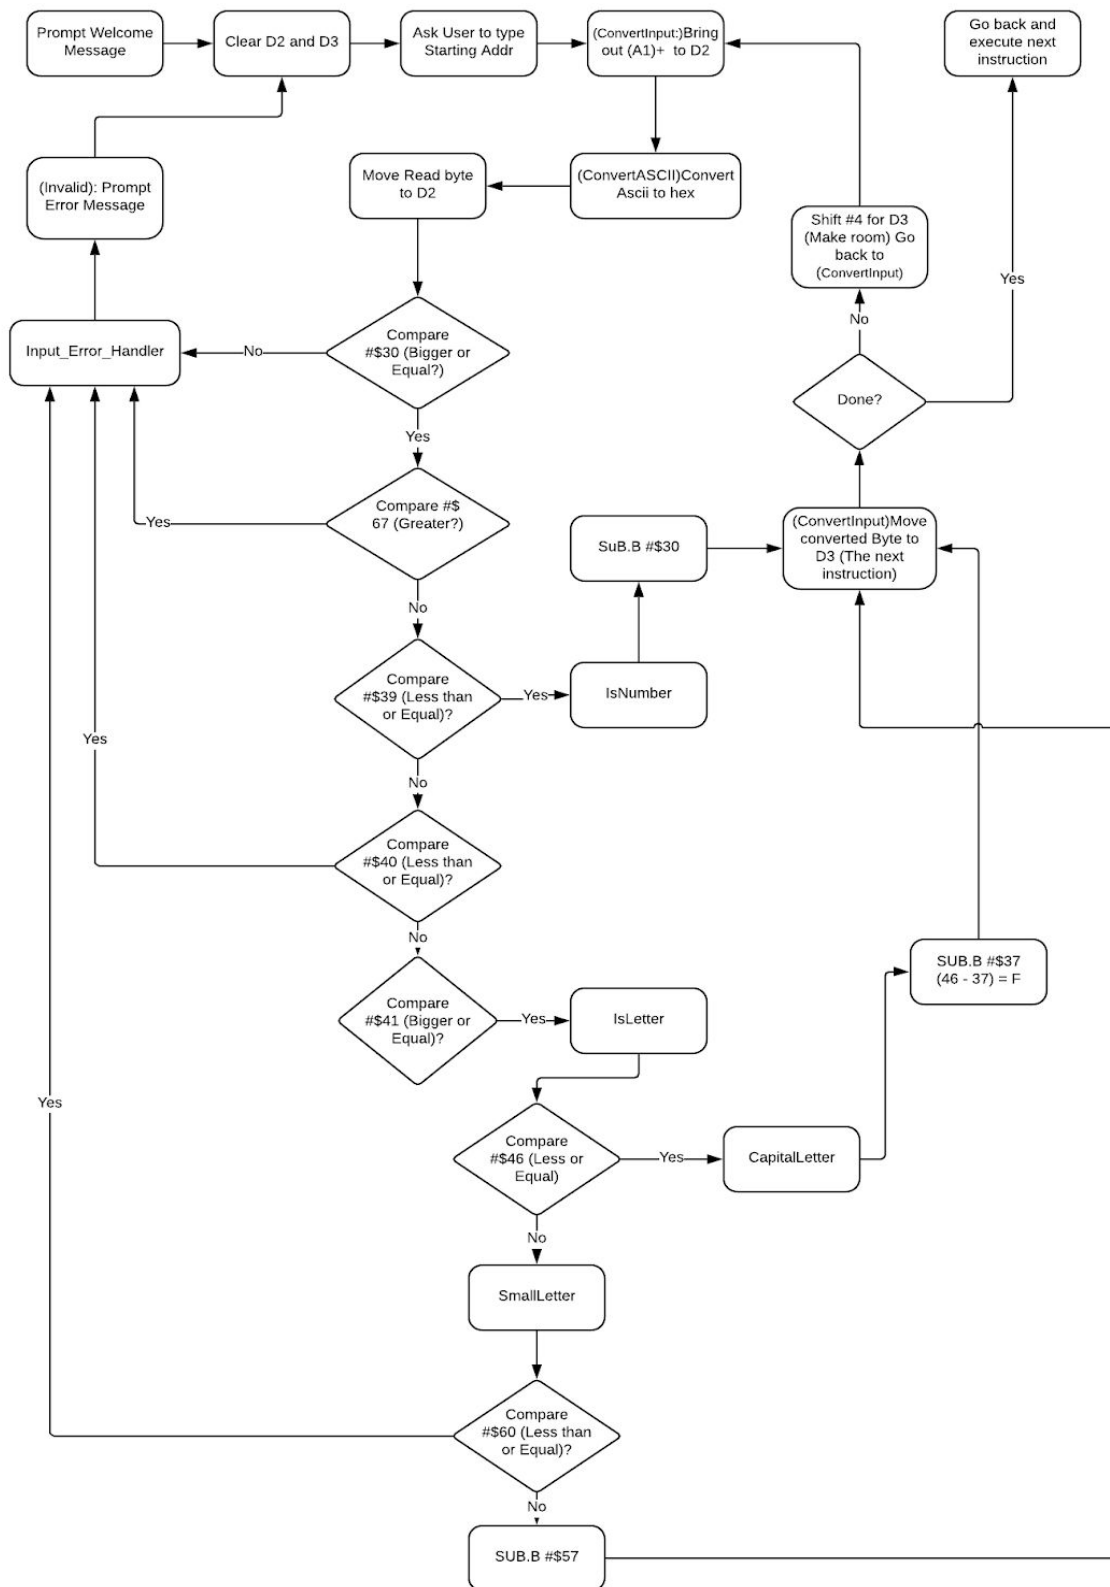

Meeting time and location

Work Completed

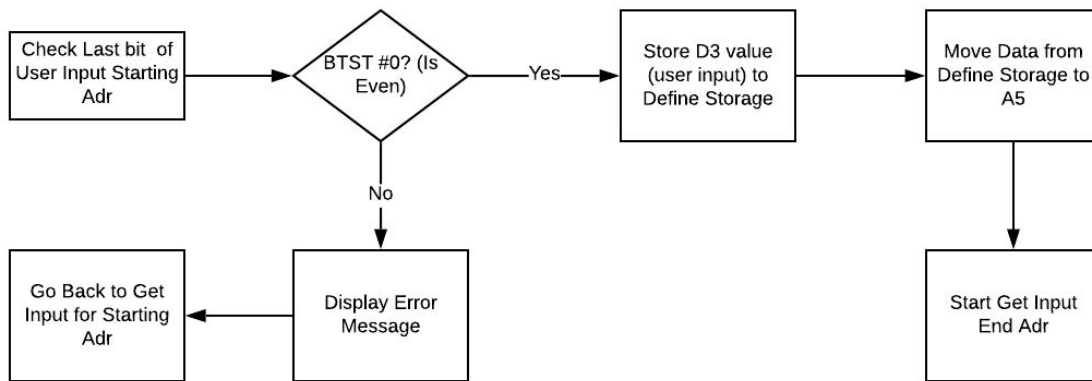

- 1) Will provided in the Zip folder with this progress report.
- 2) Flow Chart will be in the Zip folder and on the Report.

Flow Charts

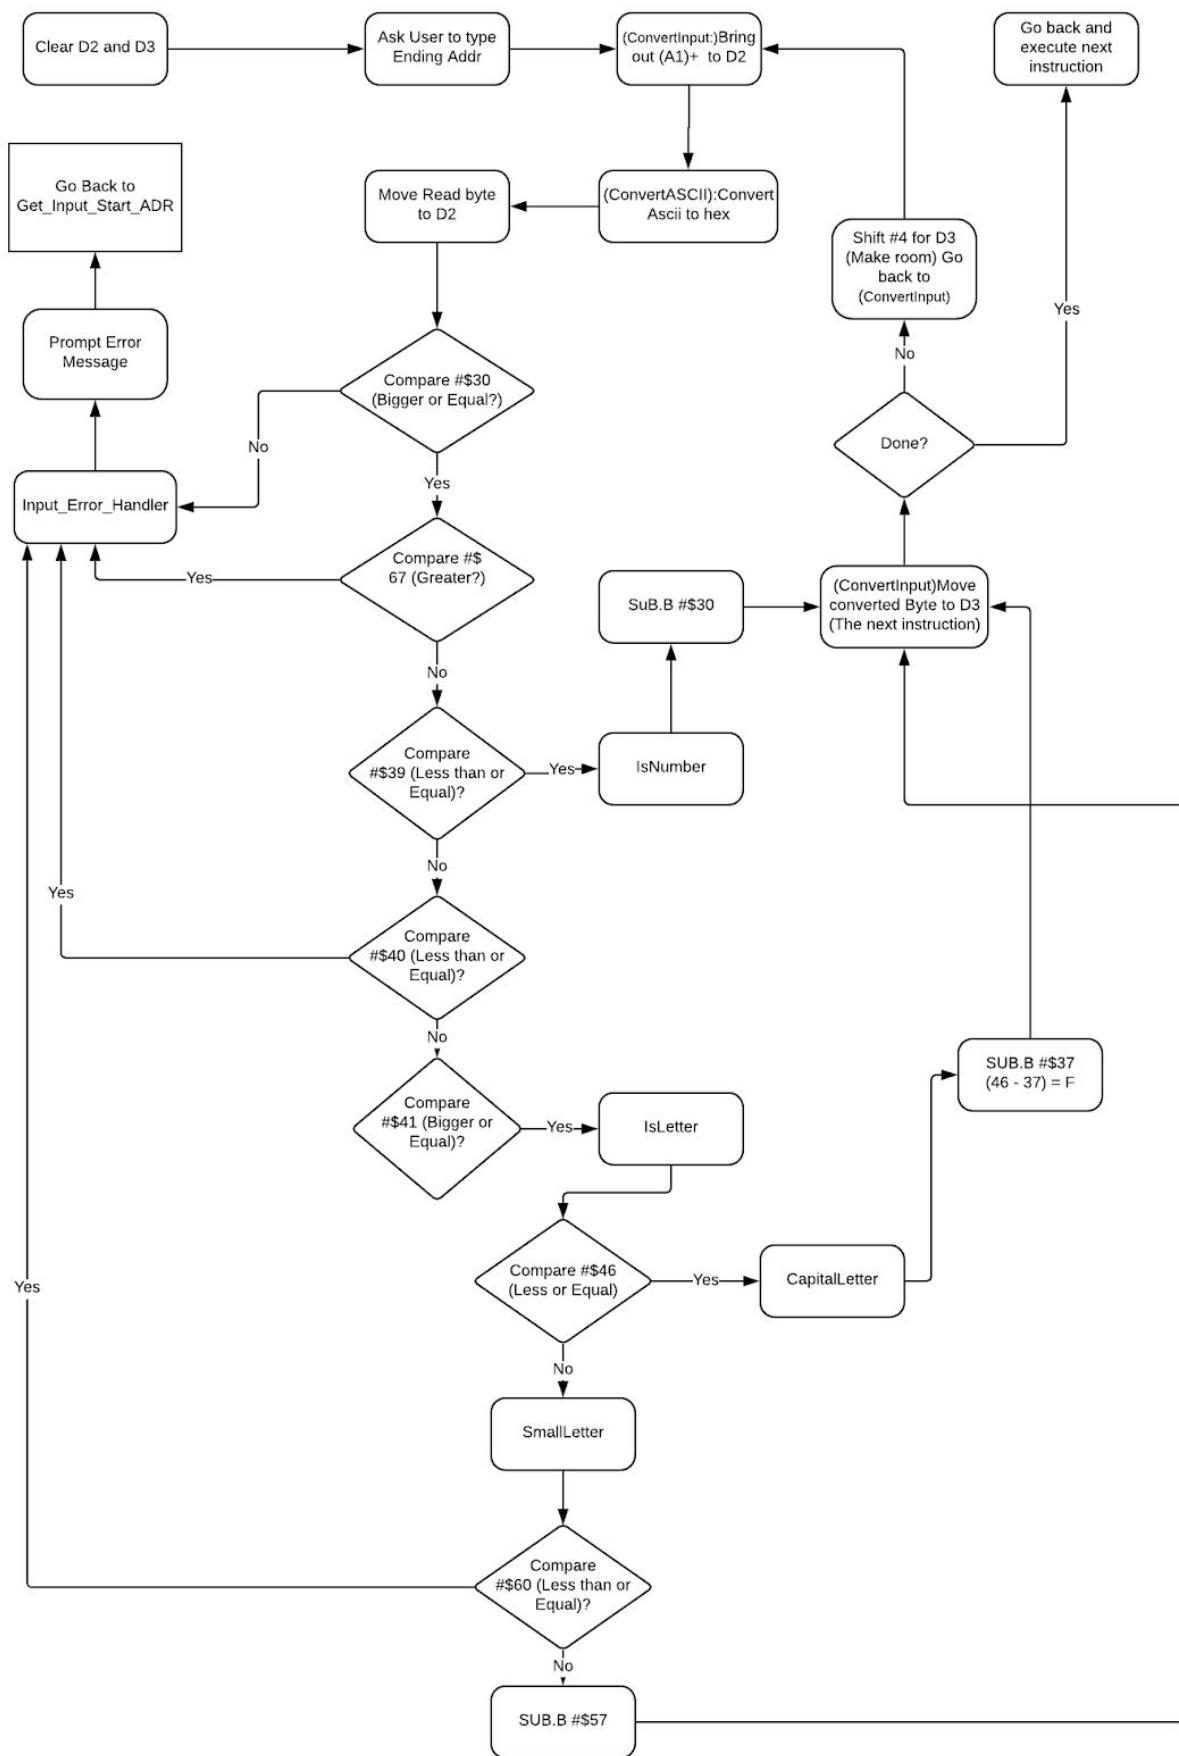

- **Input Start Address from User**

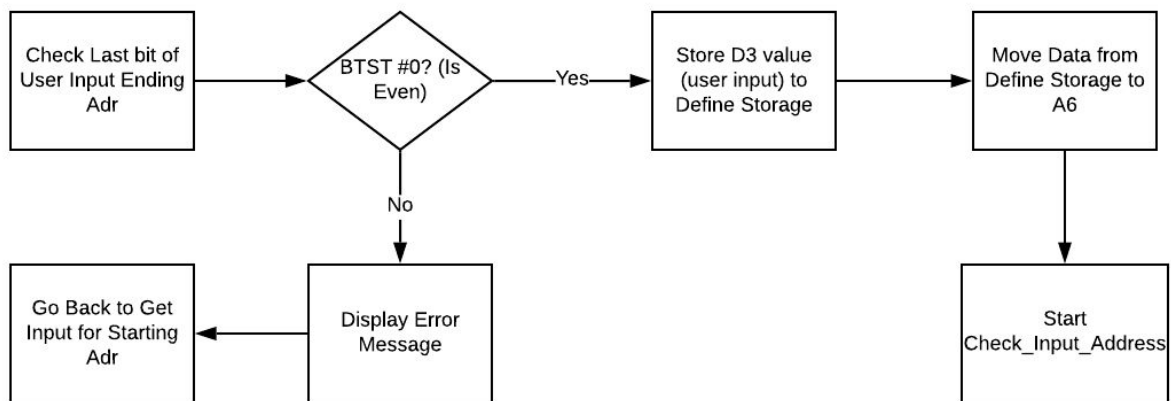

- **After Got Input for Starting Address from User**

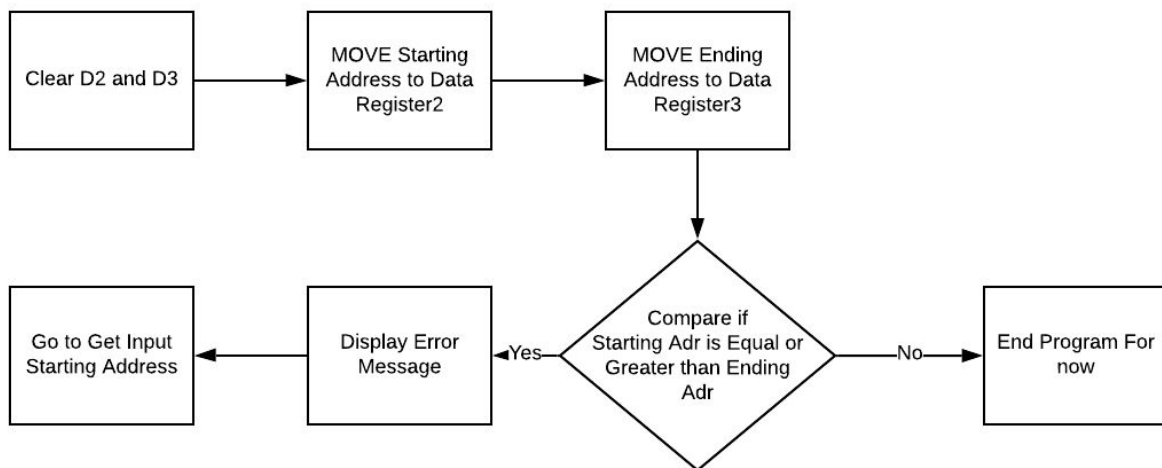

- **Input End Address from User**

- **After Got Input for Ending Address from User**

- **Once two Input Addresses are Ready**

Problems

- The proper meeting schedule is not made up yet.
- So far, we have not to try to make more progress yet (write code to convert MOVE instruction). Make the first instruction will be on the work schedule to do.

Work Scheduled

- Start organize the working schedule
- Start MOVE instruction work
- Get Ready for Progress report 3

Self Evaluation

So far tracking what has to be done. Took a lot of time to do input address stuff, but got it done. I believe I got all cases for user input, but not 100% sure.
